PROFESSIONAL SUMMARY

Security Engineer with a Master's in Cybersecurity and demonstrated expertise automating cloud defense and shifting security left. Proven ability to architect DevSecOps CI/CD pipelines, develop custom SOAR playbooks, and engineer Threat Detection rules (SIGMA) to accelerate incident response. Skilled in securing cloud infrastructure via IaC (Terraform/Checkov) and hardening container environments (Kubernetes). Adept at bridging development and security teams to deliver scalable, automated solutions that drastically reduce remediation time and fortify enterprise posture.

SECURITY ENGINEERING PORTFOLIO

GitHub: <https://github.com/emdavetechflow-collab/cybersecurity-projects-portfolio.git>

Website: <https://emdavetechflow-collab.github.io/major-project/>

Architected and deployed a comprehensive suite of enterprise-grade security automation tools:

DevSecOps & IaC: Built CI/CD pipelines (GitHub Actions, Trivy, Gitleaks) to block vulnerable code pre-deployment, and secured AWS infrastructure using Terraform and Checkov.

Cloud & Container Security: Developed custom Python CSPM tools (Boto3) to auto-remediate public S3 buckets; hardened Kubernetes manifests using Kubescape against NSA benchmarks.

Threat Detection & Automation: Deployed ELK Stack SIEMs with custom Python threat hunters; automated phishing triage via VirusTotal API; authored vendor-neutral SIGMA detection rules for Splunk and Elastic.

Architecture & Deception: Implemented Zero Trust API authentication; deployed custom Python Honeypots for threat intelligence; built Purple Team simulations validating Windows Event logging.

PROFESSIONAL EXPERIENCE

Assistant System Administrator

Allegheny County Department of Court Records – Pittsburgh, PA | 04/2025 – 07/2026

Supported public-sector technology operations across court systems, records platforms, and county-wide infrastructure.

Engineered PowerShell automation scripts for device deployment, reducing manual workload by 60% and accelerating secure configuration delivery.

Managed Identity and Access Management (IAM) processes, enforcing MFA, provisioning AD groups, and aligning configurations with Zero Trust principles.

Directed compliance-aligned security improvements utilizing CIS Controls and NIST SP 800-171 guidelines.

Coordinated OS, application, and security patch deployment across servers and endpoints; supported Tenable.io vulnerability remediation workflows.

Monitored endpoint protection platforms (CrowdStrike Falcon) to ensure secure operations and rapid threat containment.

Collaborated in weekly IT strategy meetings to improve county security posture and operational efficiency.

Leverage Wireshark and Nmap to analyze network traffic, assess potential vulnerabilities across internal systems, and support incidence response through packet level forensics.

Cybersecurity Analyst

Seton Hill University – Greensburg, PA | 10/2023 – 12/2024

Responded to SIEM alerts using Splunk; blocked malicious IPs, analyzed event logs, and applied critical patches to neutralize threats.

Managed firewall and Network Access Control (NAC) policies securing 3,000+ users and 9,000 devices.

Conducted vulnerability remediation using Tenable.io and strengthened endpoint security controls to reduce attack surface.

Implemented secure SFTP integrations across Linux and Windows systems for safe data transfer.

Assisted with compliance documentation, policy updates, and governance tasks to maintain institutional security standards.

Network Engineer

Kingho Mining Company – Sierra Leone | 06/2020 – 07/2022

Installed, configured, and maintained enterprise network infrastructure supporting 500+ employees across corporate offices, mining sites, and residential compounds.

Managed routers, switches, VPNs, and wireless access points, ensuring secure connectivity, network segmentation, and high-availability performance.

Built and maintained IT asset inventory systems for lifecycle tracking, compliance, and upgrade planning.

Implemented network monitoring and alerting using tools like SolarWinds / PRTG, improving uptime and early issue detection.

Performed LAN/WAN troubleshooting, resolving connectivity issues, optimizing bandwidth usage, and reducing network downtime.

Collaborated with security teams to enforce firewall rules, access control policies, and endpoint hardening across all sites.

IT Technician

Seton Hill University – Greensburg, PA | 2023

Provided Tier 1 support including hardware/software troubleshooting, secure configuration, and system updates.

Performed user account administration including password resets, access provisioning, and permission audits

Maintained workstation and network security through patch management, antivirus monitoring, and device hardening

Configured and deployed laptops, printers, VoIP phones, and other peripherals for new and existing employees

Monitored system performance, resolved connectivity issues, and escalated critical incidents to Tier 2/Tier 3 teams

EDUCATION

M.S. Information Technology Management (Cybersecurity Focus) | Seton Hill University | 12/2024

B.S. Computer Science | Njala University | 04/2021

CORE TECHNICAL SKILLS

Security Engineering & Automation: Python (Boto3, Flask, API Integrations), PowerShell, SOAR Playbook Development, SIGMA Rule Creation, Zero Trust Architecture, Purple Teaming.

Cloud & DevSecOps: AWS (IAM, S3, VPC), Terraform, Checkov, GitHub Actions, Docker, Kubernetes (Kubescape), CI/CD Pipeline Security, Shift Left Security.

Threat Detection & Monitoring: Elastic Stack (ELK), Splunk, Sysmon, MITRE ATT&CK Framework, Threat Hunting, Malware Sandbox Analysis, Deception Technology (Honeypots).

Infrastructure & Endpoint: Windows Server, Linux (Ubuntu, RHEL), CrowdStrike Falcon, Tenable.io, Patch Management, AD/IAM, MFA Enforcement.

GRC & Compliance: NIST CSF, NIST SP 800-171, CIS Controls, POA&M Support, Policy Documentation, FedRAMP/StateRAMP Exposure.

Professional Skills: Stakeholder Engagement, Technical Training, Cross-team Collaboration, Requirements Gathering, Documentation.

CERTIFICATIONS & TRAINING

Cybersecurity Bootcamp (Per Scholas), Endpoint Security, Network Defense.

In Progress: CompTIA Security+, CGRC, PMP

PROFESSIONAL MEMBERSHIPS --- ISACA – Member. REFERENCE
