PROFESSIONAL SUMMARY

Security engineer, network engineer and frontend developer with hands-on experience supporting public-sector IT environments, evaluating security requirements, implementing technical controls, and strengthening enterprise security posture. Skilled in IAM, SIEM monitoring, endpoint security, vulnerability remediation, workflow automation, and compliance-aligned security practices (NIST, CIS Controls). Adept at bridging business and technical teams, documenting requirements, and delivering secure, scalable solutions. Known for rapid learning, cross-team collaboration, and improving security operations through automation and process optimization.

PROFESSIONAL EXPERIENCE

Assistant System Administrator

Allegheny County Department of Court Records – Pittsburgh, PA 04/2025 – 07/2026 Supported public-sector technology operations across court systems, records platforms, and county-wide infrastructure.

Delivered customer-facing technology projects including workflow improvements, automation scripts, and system deployments.

Conducted requirements gathering with department leaders to document processes, pain points, and technical needs.

Implemented PowerShell automation for device deployment, reducing manual workload by 60%.

Managed IAM processes including MFA enforcement, AD group creation, access provisioning, and secure configuration.

Supported compliance-aligned security improvements using CIS Controls and NIST 800-171 guidelines.

Applied OS, application, and security patches across servers and endpoints; supported Tenable.io remediation workflows.

Worked with endpoint protection platforms (CrowdStrike Falcon) to support secure operations.

Installed and configured computers, printers, scanners, and specialized county devices.

Maintained hardware/software inventories, license records, and lifecycle documentation.

Delivered training to county employees on cybersecurity best practices and secure Microsoft Teams usage.

Participated in weekly IT strategy meetings to improve security posture and operational efficiency.

Cybersecurity Analyst

Seton Hill University – Greensburg, PA 05/2024 – 12/2024

Responded to SIEM alerts using Splunk; blocked malicious IPs and applied critical patches.

Managed firewall and NAC policies for 3,000+ users and 9,000 devices.

Implemented secure SFTP integrations across Linux and Windows systems.

Conducted vulnerability remediation using Tenable.io and strengthened endpoint security controls.

Assisted with compliance documentation, policy updates, and governance tasks.

Monitored endpoint security using CrowdStrike Falcon dashboards.

Network Engineer

Kingho Mining Company – Sierra Leone 06/2020 – 07/2022

Installed, configured, and maintained network infrastructure supporting 500+ employees.

Managed routers, switches, VPNs, and access points across corporate and residential sites.

Supported secure connectivity, network segmentation, and troubleshooting.

Built and maintained IT asset inventory systems for lifecycle and upgrade planning.

IT Technician

Seton Hill University – Greensburg, PA 2023

Provided Tier 1 support including hardware/software troubleshooting and escalation.

Assisted with secure configuration, system updates, and endpoint setup.

EDUCATION

M.S. Information Technology Management (Cybersecurity Focus) Seton Hill University — 12/2024

B.S. Computer Science Njala University — 04/2021

CORE SKILLS (Tailored to GRC Consultant Role)

GRC & Cybersecurity

Governance, Risk & Compliance concepts

NIST CSF, NIST SP 800-171 familiarity

FedRAMP / StateRAMP exposure

CIS Controls

Policy updates & compliance documentation

POA&M support

SaaS & Systems Implementation

Microsoft 365 / Teams

Microsoft Dynamics (exposure)

ServiceNow / Atlassian (conceptual familiarity)

Workflow automation

Requirements gathering

Customer-facing technical delivery

Automation & Reporting

PowerShell scripting

Bash / Python

Dashboards, reports, workflows

Process automation solutions

Systems Administration

Windows Server

Linux (Ubuntu, RHEL)

Patch management

Secure configuration

AD/IAM

MFA enforcement

Network Engineering

Routers, switches, VPNs

Network segmentation

NAC policies

Troubleshooting

Security Operations

Splunk SIEM

Tenable.io

CrowdStrike Falcon

Sysmon / Event Logs

Endpoint hardening

CVE remediation

Professional Skills

Stakeholder engagement

Technical training

Documentation

Cross-team collaboration

Remote work readiness

Self-directed learning

CERTIFICATIONS & TRAINING

Cybersecurity Bootcamp (Per Scholas)

Endpoint Security

Network Defense

Linux OS Recommended / In Progress: Security+, CGRC, PMP

PROFESSIONAL MEMBERSHIPS

ISACA – Member
